

CORNER GUARD – GALVANISED

1200mm Galvanised Corner Guards

Description:

The 1200mm Galvanised Corner Guards are heavy-duty protective barriers designed to shield wall and column corners from impact damage. Made from high-quality galvanised steel, they provide long-lasting durability and resistance to corrosion, making them ideal for industrial, commercial, and warehouse environments. These corner guards help prevent damage from forklifts, trolleys, and vehicles, ensuring the longevity of infrastructure.

Features:

- Strong and impact-resistant to protect walls and structural corners
- Galvanised finish for superior rust and weather resistance
- Easy to install with pre-drilled holes (if applicable)
- Suitable for indoor and outdoor use

Uses:

- Protects walls, columns, and corners from damage in warehouses and industrial facilities
- Shields parking structures, loading docks, and garages from vehicle impact
- Ideal for factories, retail spaces, and commercial buildings with high traffic
- Prevents chipping, dents, and structural damage in heavy-use areas
- Enhances workplace safety and durability of infrastructure

Specifications:

Material	Length	Height	Width	Weight
Material: Heavy-duty galvanised steel for maximum strength and corrosion resistance	75mm	1200mm (1.2 metres)	75mm	4.10 kilograms
