

CORNER GUARD – RUBBER

800mm Rubber Corner Guard – Black & Yellow Reflective

Description:

The 800mm Rubber Corner Guard is a high-visibility protective barrier designed to prevent damage to wall edges and structural corners in high-traffic areas. Made from durable rubber with black and yellow reflective strips, it enhances safety by providing impact resistance and improving visibility, even in low-light conditions. Ideal for warehouses, car parks, loading docks, and industrial facilities.

Features:

- Black and yellow reflective strips for enhanced visibility
- Flexible yet strong construction to absorb impacts from vehicles and trolleys
- Resistant to weather, moisture, and corrosion for long-lasting use
- Easy to install with pre-drilled holes (if applicable)

Uses:

- Protects corners and edges from impact damage in warehouses and factories
- Ideal for car parks, garages, and loading docks to prevent vehicle collisions
- Enhances safety by improving visibility in dimly lit areas
- Used in commercial and industrial spaces to prevent wall damage from forklifts, pallet jacks, and trolleys
- Suitable for indoor and outdoor applications

Specifications:

Material	Length	Height	Width	Weight
Heavy-duty rubber for superior impact absorption	90mm	800mm (0.8 metres)	90mm	2.00 kilograms
