

INGROUND BOLLARD

90mm Diameter Inground Bollard – Yellow

Description:

The 90mm Diameter Inground Bollard is a high-visibility, heavy-duty safety post designed to provide protection and traffic control in both commercial and industrial environments. Made from durable steel and coated with a bright yellow finish, this bollard is ideal for pedestrian safety, vehicle restriction, and property protection. The inground installation ensures a secure and permanent fixture for long-term use.

Features:

- **Heavy-Duty Construction:** Built from strong steel for maximum impact resistance.
- **High-Visibility Yellow Coating:** Enhances visibility for safety and hazard prevention.
- **Inground Installation:** Provides a secure and permanent fixture.
- **Corrosion-Resistant Finish:** Designed to withstand harsh weather conditions.
- **Versatile Use:** Suitable for commercial, industrial, and public spaces.
- **Low Maintenance:** Requires minimal upkeep for long-term performance.

Uses:

- **Traffic & Parking Control:** Prevents unauthorized vehicle access.
- **Pedestrian Safety:** Creates barriers to separate pedestrians from vehicles.
- **Property & Asset Protection:** Safeguards buildings, equipment, and storefronts.
- **Warehouse & Industrial Sites:** Shields loading docks, racking, and storage areas.
- **Public Spaces & Parks:** Directs foot and vehicle traffic safely.

Specifications:

Material	Diameter	Height	Width	Weight	Color	Installation
Heavy-duty steel	90mm	1600mm	90mm	10.10 Kilograms	High-visibility Yellow	Inground, requires setting in concrete for stability
