

WHEEL STOPS

Concrete Wheel Stop – 1650m

Description:

The Concrete Wheel Stop is a heavy-duty, long-lasting parking solution designed to prevent vehicle overruns and protect property, pedestrians, and surrounding infrastructure. Manufactured from reinforced concrete, it offers exceptional durability and stability, making it ideal for high-traffic commercial, industrial, and residential parking areas.

Features:

- Highly durable and impact-resistant
- Weatherproof and UV-resistant for long-term outdoor use
- Pre-cast design with pre-drilled fixing holes for secure installation
- Minimal maintenance required compared to rubber or plastic alternatives
- Designed to withstand heavy vehicle traffic

Uses:

- Prevents vehicle overruns in car parks, garages, and driveways
- Protects walls, fences, sidewalks, and pedestrian areas from accidental collisions
- Ideal for commercial, industrial, and high-traffic parking facilities
- Used in shopping centres, office buildings, warehouses, and public parking areas
- Provides clear parking boundaries and helps guide drivers into designated spots

Specifications:

Material	Length	Height	Width	Weight
Heavy-duty rubber for superior impact absorption	1650mm (1.65 metres)	100mm	150mm	65.00 kilograms for maximum stability
