

CONVEX MIRRORS

Safety Mirror – Includes Post Mount Bracket

Description:

The 600mm Diameter Convex Safety Mirror is designed to enhance visibility and reduce blind spots in high-traffic areas, roadways, warehouses, and commercial properties. With a wide-angle convex lens, it provides an expanded field of vision, helping to prevent accidents and improve safety. The mirror comes with a durable post mount bracket for easy installation on poles or posts, making it ideal for both indoor and outdoor use.

Features:

- Wide-Angle Convex Design – Provides increased visibility for driveways, intersections, and blind spots.
- Durable Construction – Built with high-quality materials for long-lasting performance.
- Weather-Resistant – Designed to withstand harsh outdoor conditions, including UV exposure, rain, and wind.
- Post Mount Bracket Included – Ensures secure and easy installation on poles or posts.
- Lightweight & Impact-Resistant – Reduces the risk of breakage and damage.
- Clear Reflective Surface – Offers sharp and distortion-free visibility for enhanced safety.

Uses:

- Road & Traffic Safety – Improves visibility at intersections, parking lots, and driveways.
- Warehouse & Industrial Applications – Helps forklift operators and workers avoid collisions in busy environments.
- Retail & Commercial Spaces – Enhances security by reducing blind spots near storefronts and parking areas.
- Schools & Public Areas – Provides added safety in high-traffic pedestrian zones.
- Driveways & Garages – Allows clear sight of approaching vehicles and pedestrians.

Specifications:

| Mirror Diameter | Length | Height | Width | Weight | Mounting |
|-----------------|--------|--------|-------|----------------|-----------------------------|
| 600mm | 610mm | 620mm | 120mm | 2.10 Kilograms | Post mount bracket included |
