

DOWNPIPE PROTECTORS

Safety Downpipe Protector – 250mm
(Galvanised Steel, 2mm Thick)

Description:

The Safety Downpipe Protector (250mm) is a robust and durable shield designed to protect exposed downpipes from accidental damage caused by vehicles, forklifts, and heavy equipment. Constructed from 2mm thick galvanised steel, it ensures long-lasting corrosion resistance and is suitable for indoor and outdoor use in high-traffic environments.

Features:

- Heavy-Duty Protection – Prevents dents, cracks, and breakages in exposed downpipes.
- Premium Galvanised Steel – Rust-resistant and weatherproof, ideal for harsh environments.
- Larger Coverage (250mm Width) – Offers enhanced protection for wider pipes and downspouts.
- Easy Installation – Securely bolts to walls or concrete surfaces for maximum stability.
- Low Maintenance – Designed for long-term durability with minimal upkeep.

Uses:

- Warehouses & Industrial Sites – Prevents damage to drainage systems from forklifts and pallet jacks.
- Car Parks & Loading Docks – Shields pipes from accidental collisions with trucks and trolleys.
- Retail & Commercial Spaces – Ensures long-term protection for downpipes in high-traffic areas.
- Public Infrastructure & Schools – Prevents vandalism and damage to essential drainage.

Specifications:

Material	Length	Height	Width	Weight	Finish
2mm thick galvanised steel	250mm	1200mm	250mm	16.30 Kilograms	Corrosion-resistant, durable coating
