

PLASTIC SPEED HUMPS

Plastic – End Cap

Description:

The Plastic End Cap is a durable and lightweight component designed to provide a secure and professional finish to open-ended structures. It helps protect edges from damage, enhances safety by covering sharp ends, and provides a neat appearance. Made from high-quality plastic, it offers excellent resistance to wear, impact, and environmental conditions.

Features:

- Lightweight yet sturdy construction
- Protects edges from damage and wear
- Resistant to corrosion, weather, and impact
- Easy to install and secure fit

Uses:

- Covers open ends of pipes, tubes, or structural components
- Provides a finished look to plastic or metal assemblies
- Protects against dust, dirt, and moisture entry
Commonly used in construction, manufacturing, and industrial applications
- Enhances safety by covering sharp edges

Specifications:

Material	Length	Height	Width	Weight
High-strength, durable plastic	17mm	5mm	35mm	0.30 kilograms
