

PLASTIC SPEED HUMPS

Plastic - Middle Section

Description:

The Plastic Middle Section is a durable and lightweight component designed for use in various applications requiring structural support, separation, or reinforcement. Made from high-quality plastic, it provides strength while remaining easy to handle and install.

Features:

- Lightweight yet sturdy design
- Weather-resistant and corrosion-free
- Easy to install and maintain

Uses:

- Structural support in plastic or modular assemblies
- Separation or reinforcement in construction applications
- Component in plastic barriers, panels, or enclosures
- Various industrial and commercial applications

Specifications:

Material	Length	Height	Width	Weight
High-strength plastic for durability and resistance to wear	2.5mm	50mm	32mm	1.20 kilograms
