

# WHEEL STOPS

Premium Wheel Stop –  
Vulcanized Rubber (1650mm)

### Description:

The Premium Wheel Stop is a high-quality, heavy-duty parking solution designed to prevent vehicle overruns and protect surrounding structures. Made from vulcanized rubber, it is built for durability, impact resistance, and long-lasting performance. Its black rubber body with reflective markings ensures high visibility in various lighting conditions. Ideal for commercial, industrial, and residential parking areas, this wheel stop provides a reliable and safe parking guide.

### Features:

- 5-Year Warranty for guaranteed long-term performance
- Weather-resistant and UV-stabilized for both indoor and outdoor use
- Impact-absorbing design helps protect vehicles and infrastructure
- Black rubber with reflective markings for enhanced visibility and safety
- Pre-drilled mounting holes for easy installation (fixings sold separately)
- Lightweight compared to concrete wheel stops for easier handling and installation

### Uses:

- Prevents vehicle overruns in parking lots, garages, and driveways
- Protects walls, fences, and other structures from vehicle impact
- Ideal for commercial, industrial, and residential car parks
- Used in shopping centres, office buildings, and warehouses
- Helps guide drivers into designated parking spots safely

### Specifications:

Material	Length	Height	Width	Weight
Heavy-duty rubber for superior impact absorption	1650mm (1.65 metres)	100mm	150mm	12.80 kilograms
