

INGROUND BOLLARD

140mm Diameter Inground Bollard – Yellow

Description:

The 140mm Diameter Inground Bollard is a high-strength, heavy-duty safety post designed for vehicle restriction, pedestrian safety, and asset protection in commercial, industrial, and public spaces. Made from robust steel and coated with a high-visibility yellow finish, this bollard ensures maximum durability and visibility. Its inground installation provides a secure and permanent fixture, ideal for traffic control and security applications.

Features:

- Heavy-Duty Steel Construction: Designed to withstand high-impact forces.
- High-Visibility Yellow Coating: Enhances awareness and prevents accidents.
- Inground Installation: Provides a stable and permanent security solution.
- Weather & Corrosion Resistant: Built for long-term outdoor and industrial use.
- Versatile Application: Suitable for commercial, industrial, and public areas.
- Low Maintenance: Requires minimal upkeep for long-term reliability.

Uses:

- Traffic & Parking Control: Restricts vehicle access and enhances safety.
- Pedestrian & Public Safety: Acts as a protective barrier in high-traffic zones.
- Property & Asset Protection: Shields storefronts, buildings, and loading docks.
- Industrial & Warehouse Security: Protects equipment, racking, and restricted areas.
- Public Spaces & Parks: Helps manage traffic flow and pedestrian safety.

Specifications:

Material	Diameter	Height	Width	Weight	Color	Installation
Heavy-duty steel	140mm	1600mm	140mm	24.28 Kilograms	High-visibility Yellow	Inground, requires concrete setting for maximum stability
