

SURFACE MOUNT BOLLARD

140mm Diameter Surface Mount Bollard – 316 Stainless Steel

Description:

The 140mm Diameter Surface Mount Bollard is a premium-grade security solution designed for high-traffic areas, commercial spaces, and public environments. Constructed from 316 stainless steel, this bollard offers exceptional durability, corrosion resistance, and a sleek, modern finish. The surface mount design allows for easy installation on concrete or asphalt surfaces, making it ideal for urban areas, coastal environments, and high-end commercial properties.

Features:

- 316 Stainless Steel Construction – Provides maximum strength and resistance to rust and corrosion, even in marine and coastal environments.
- Sleek & Modern Design – Enhances the aesthetic appeal of public and commercial spaces.
- Surface Mount Installation – Ensures quick and secure attachment without deep excavation.
- Weather & Corrosion Resistant – Built to withstand harsh outdoor conditions.
- Low Maintenance – Requires minimal upkeep while maintaining its polished appearance.
- High-Impact Protection – Helps prevent vehicle intrusion and safeguards pedestrians and property.

Uses:

- Traffic & Pedestrian Control – Helps manage vehicle access in urban and commercial areas.
- Coastal & Marine Environments – Ideal for seaside locations due to superior corrosion resistance.
- Architectural & Urban Design – Adds a modern, professional look to buildings and landscapes.
- High-End Commercial Spaces – Suitable for shopping centers, office buildings, and hotels.
- Parking & Asset Protection – Protects storefronts, entrances, and walkways from vehicle collisions.
- Security Applications – Serves as a barrier against unauthorized vehicle access.
