

SINGLE HOOP BIKE RACKS

Surface Mount Hoop – Galvanised

Description:

The Surface Mount Hoop -

Galvanised is a durable and space-efficient bike rack designed for secure bicycle parking. Made from high-quality galvanised steel, it is highly resistant to rust and corrosion, making it ideal for both indoor and outdoor use. The surface-mounted design allows for easy installation on concrete or paved surfaces, ensuring stability and reliability.

Features:

- Heavy-Duty Galvanised Steel: Corrosion-resistant for long-lasting durability.
- Secure & Stable Design: Provides a sturdy locking point for bicycles.
- Space-Saving Structure: Ideal for compact storage solutions.
- Easy Surface Mounting: Can be securely fixed to concrete or paved surfaces.
- Weather-Resistant Finish: Suitable for outdoor environments.
- Versatile Use: Compatible with a variety of bike types and locking mechanisms.

Uses:

- Public Spaces & Parks: Provides secure bike parking in community areas.
- Residential & Commercial Buildings: Ideal for apartment complexes, offices, and shopping centers.
- Schools & Universities: Offers students and staff a reliable bicycle parking solution.
- Transport Hubs: Suitable for train stations, bus stops, and parking lots.
- Retail & Bike Shops: Ensures safe and organized bike storage for customers.
