

DOWNPIPE PROTECTORS

SafetyDownpipe Protector–200mm
(GalvanisedSteel, 2mmThick)

Description:

The Safety Downpipe Protector is a heavy-duty guard designed to protect exposed downpipes and drainage systems from accidental damage caused by vehicles, forklifts, and heavy equipment. Manufactured from 2mm thick galvanised steel, it provides exceptional durability and corrosion resistance, making it ideal for both indoor and outdoor application.

Features:

- Heavy-Duty Protection – Shields downpipes from impacts, dents, and structural damage.
- Premium Galvanised Steel – Rust-resistant and weatherproof for long-term outdoor use.
- Compact & Sturdy Design – 200mm width fits standard downpipes while maintaining a low-profile appearance.
- Easy Installation – Can be securely bolted to walls or concrete surfaces.
- Low Maintenance – Requires minimal upkeep and ensures long-lasting performance.

Uses:

- Warehouses & Industrial Facilities – Prevents damage to downpipes in high-traffic areas.
- Commercial Buildings & Shopping Centres – Protects drainage infrastructure from trolley and vehicle impact.
- Car Parks & Loading Bays – Shields pipes from accidental collisions by trucks and forklifts.
- Public Spaces & Schools – Ensures downpipes remain intact and functional in busy environments.

Specifications:

Material	Length	Height	Width	Weight	Finish
2mm thick galvanised steel	250mm	1200mm	200mm	15.30 Kilograms	Corrosion-resistant, durable coating
